

OUR HISTORY

The Central Library opened in March 2011 in the INNO-Share building. The library, which covers almost 4,500 square metres, offers a modern and cosy environment to meet all needs of readers who want to learn and spend time in an inspiring environment.

In addition to the classic basic services of the library, we support competitive education, high quality scientific research and the promotion of innovation at the SZE, adapted to the economic and social needs.
