## **The largest and most important database of scientific records in Hungary.**

- Built by the authors themselves, a unique register.
- It can provide the most authentic picture of authors' publication and scientific metrics.
- It is linked to all other Hungarian national databases (e.g. doktori.hu).
- Publicly visible data: institutional affiliation, number of citations, summary and subject table data (science metrics), publications and their availability, researcher identifiers.

## MTMT LIBRARIANS

**MTMT - Magyar Tudományos Művek Tára (Hungarian Scientific Bibliography)**

The Hungarian Science Bibliography (Magyar Tudományos Művek Tára, MTMT) is the database of scientific papers. The importance of MTMT lies in the fact that it provides a nationally uniform and freely accessible scientific bibliography. For more information, please visit [MTMT website](#).

Széchenyi István University professors, and PhD students register and upload their publication and reference list to MTMT.

The University Library staff are happy to assist you in any question and request problem of the MTMT database.

The table below shows which department or organization belongs to which librarian. Please contact us if you need any assistance.
